

The world's most comprehensive patent database

Lexis Nexis® TotalPatent™

LexisNexis® TotalPatent™

The largest online collection of enhanced patent data

When it comes to global patent filing, patent infringement and patent licensing activities, you need a resource that provides you with the most comprehensive, precise, and dynamic patent research and retrieval system available anywhere.

- **Protect, develop, and maintain your IP assets.**

Improve the quality of your research and stay fully informed with easy access to the world's largest collection of searchable full-text and bibliographic information—with images, citations, legal status, and patent family collections all in one place.

- **Maximize IP asset revenue.**

Get the timely information you need to strengthen your patents and invalidate competitive threats for better business outcomes. TotalPatent will allow you to get more done at a lower cost.

- **Understand your competitors and acquisition targets.**

Quickly understand what others are doing and make sound business decisions with a streamlined analysis process.

- **Improve patent integrity and corporate confidence.**

Access the most comprehensive patent information. TotalPatent includes full text from more patent authorities than any other provider.

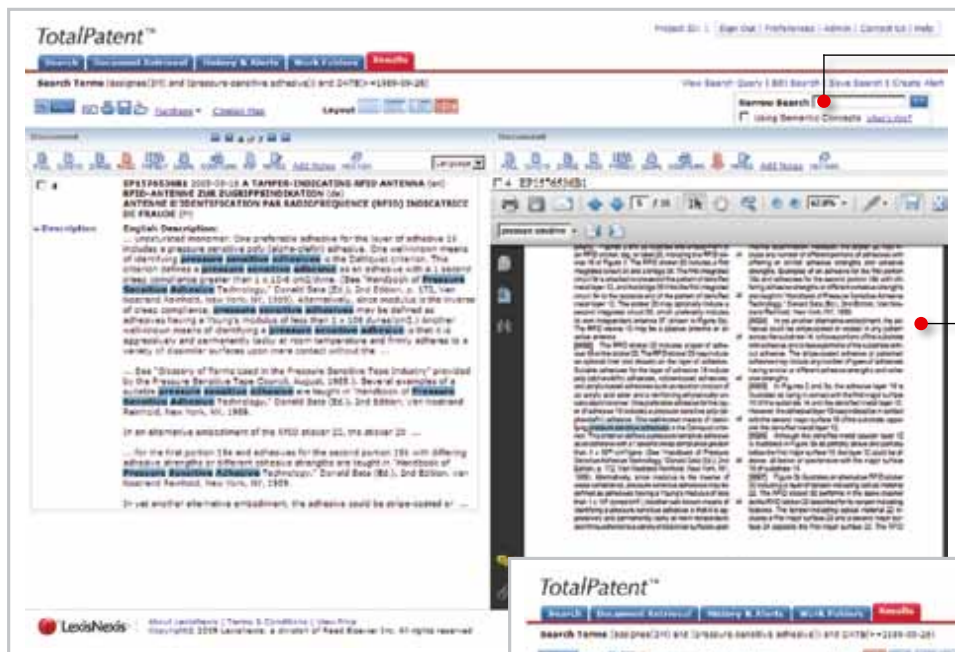

LexisNexis® TotalPatent™

Designed to help you protect your intellectual property and optimise its potential

Access to extensive LexisNexis® patent database, including the **full text** from over 30 authorities, **bibliographic** and **abstract data** from over 100 authorities and access to **British granted patent applications**.

With more than **50 million main patent families** and over **85 million patent documents**, TotalPatent offers access to the most comprehensive online collection of patent information in the world.

Depth of search:

Databases are searchable both in the **language of publication** and in **English language machine translations**, including Japanese, Chinese, Korean and Russian.

Document display:

Flexible views to help you make side-by-side comparisons

Results list:

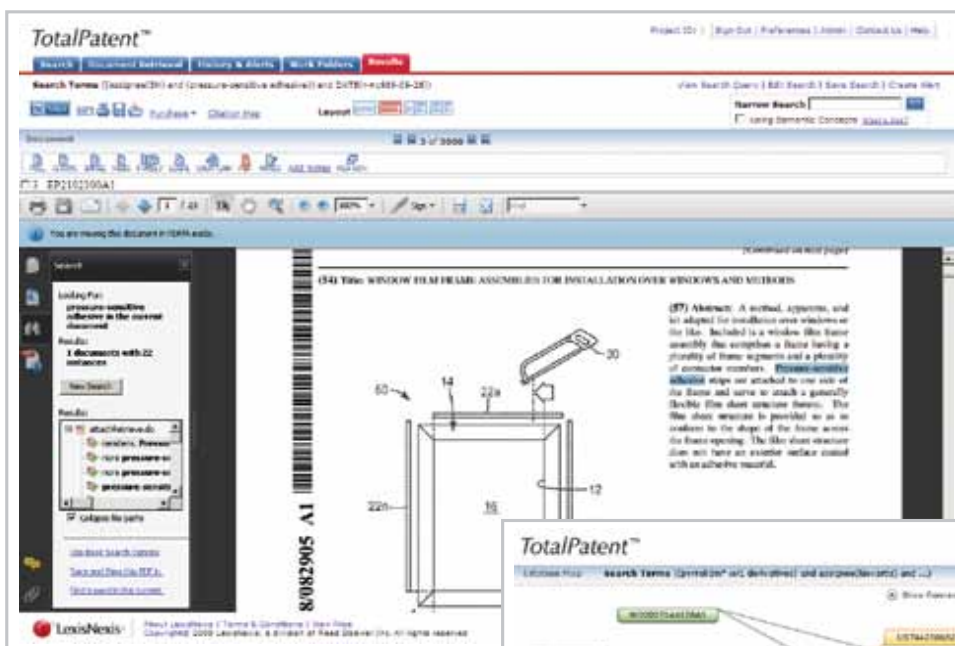

Ability to view highlighted hit terms and Key Words in Context (KWIC™)

LexisNexis® TotalPatent™

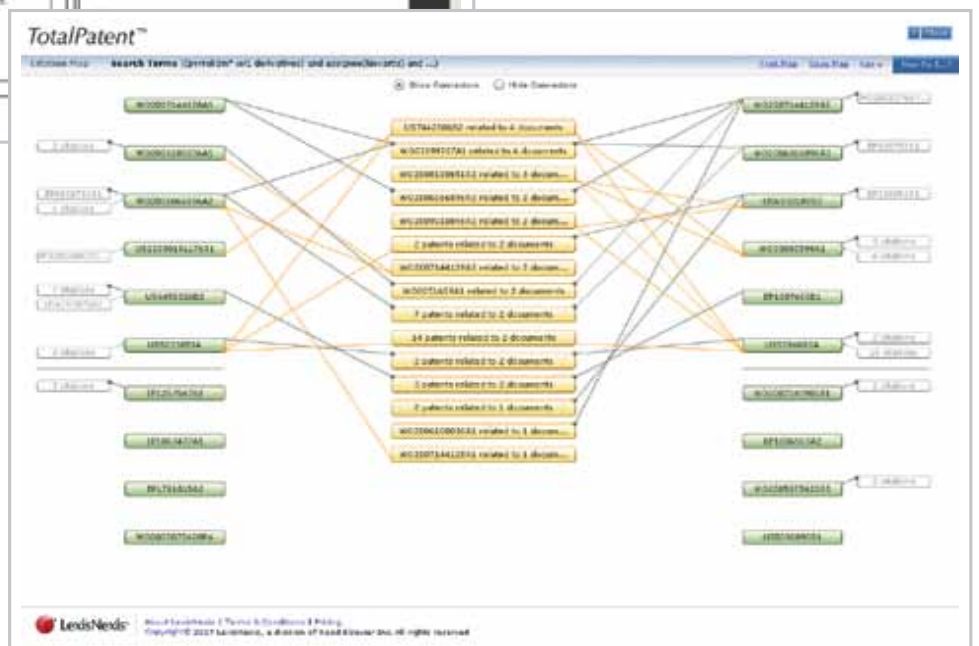

Over 300 searchable fields - the combination of **unrivaled content and thorough indexing** allows you to create **complex or highly detailed searches**.

LexisNexis® Semantic Search improves your search results by suggesting concepts that relate semantically to your search query. You can review the suggested concepts, assign relative importance (weighting), eliminate concepts you don't wish to use, or add more concepts of your own.

Value-added PDFs – searchable, bookmarked, multi-page and compressed PDFs for ease of searching and downloading

Citation mapping:
Allows you to view multiple relationship sites
