

Surveys

COLLECT. ANALYSE. INFORM.

Design your own surveys. Collect responses. Analyse results. Make informed decisions.

Why Lexis GRC?

A comprehensive reputation protection solution supported by world-class regulatory content. It is the governance, risk, and compliance software that executive boards rely on. With a variety of modules available, you can customise your solution to meet your specific requirements.

Other Lexis GRC modules

- Auditing
- Compliance
- Enterprise Risk Management
- Forms and Checklists
- HIRA
- Incident Management
- Legal Universe & Registers
- Lexis® Assure Regulatory Alerts
- Occupational Hygiene
- Surveys

Respondents complete surveys online using computers, tablets or smart phones and results become available in real-time.

Respondents can track progress as they complete surveys as well as save and continue later when working on larger surveys.

Analyse results and findings

Generate automated reports at the push of a button. Standard reports allow you to analyse survey results, qualitative and quantitative data. Search and filter to segment data and make informed decisions based on the results. Build and maintain your own reports with templates that conform to your organisation's corporate identity.

Take action and integrate with other modules

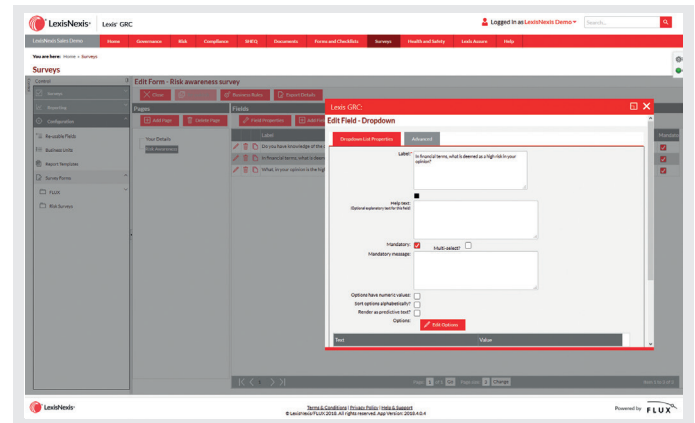

Take action based on survey results, analyses and findings and use them to inform governance, risk and compliance management. Link surveys to hazards, risks, incidents and audits or kick off processes that are informed by survey results.

Collect survey responses

Respondents complete surveys online using computers, tablets or smart phones and results become available in real-time.

Gain valuable insights through surveys

Design your own surveys and distribute them to internal or external contact lists to gather responses and analyse the results. Conduct surveys to inform risk identification, appetite and tolerance, ad-hoc surveys for compliance, risk, health, safety, environment, awareness, supplier and client assessments or any other topic of interest. Make more informed decisions and take action based on survey results and findings.

Design your own surveys

The user-friendly form builder allows you to design and build your own surveys quickly and easily with limited technical knowledge required. Build basic surveys or split larger surveys into multiple pages, ask qualitative and quantitative questions and add business rules and logic to create intelligent surveys to only ask the most relevant questions.

Distribute to survey respondents

Send e-mails to survey respondents using the built-in mail system that keeps track of contacts, invalid e-mail addresses and unsubscribes. Maximise mail delivery with the built-in spam score checker and view detailed analytics and reports on mail delivery rates through to survey response rates.

Choose a value for money system that evolves with you. If you are looking to conserve resources, minimise risk and guarantee continuous improvement, don't start from scratch - contact LexisNexis today.
