

Lexis[®]Sign release notes

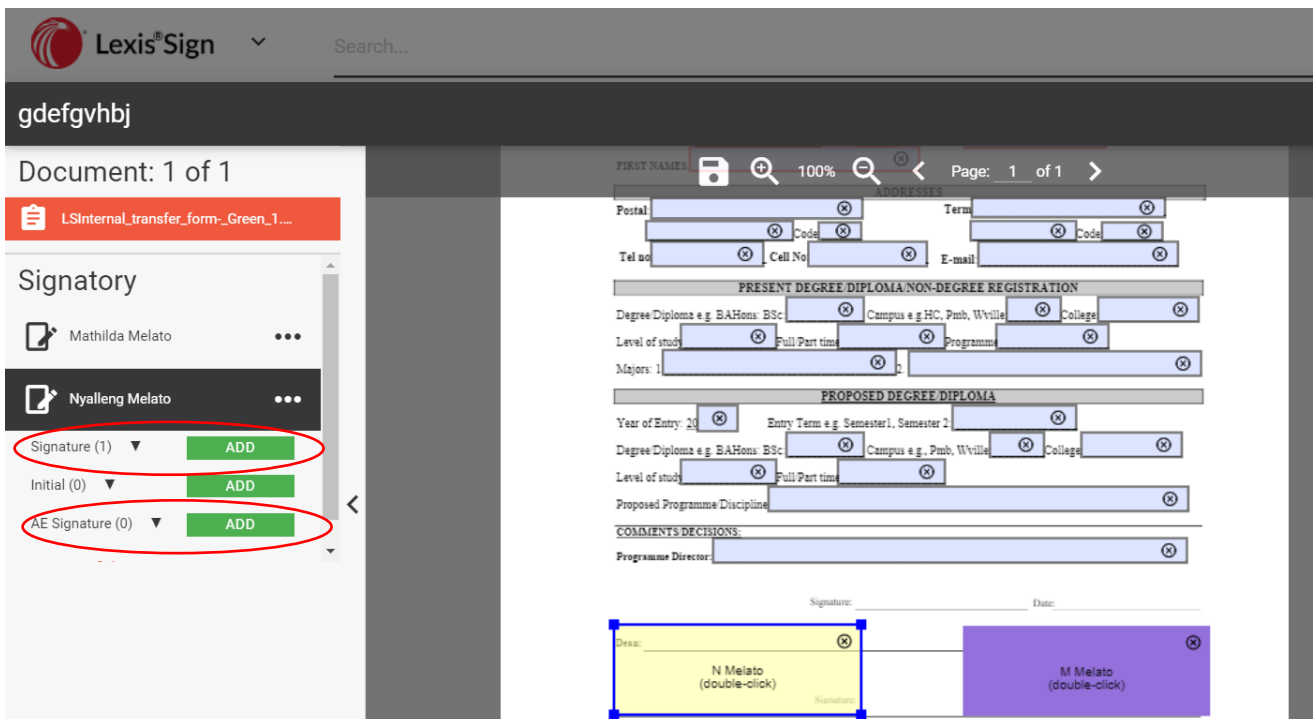

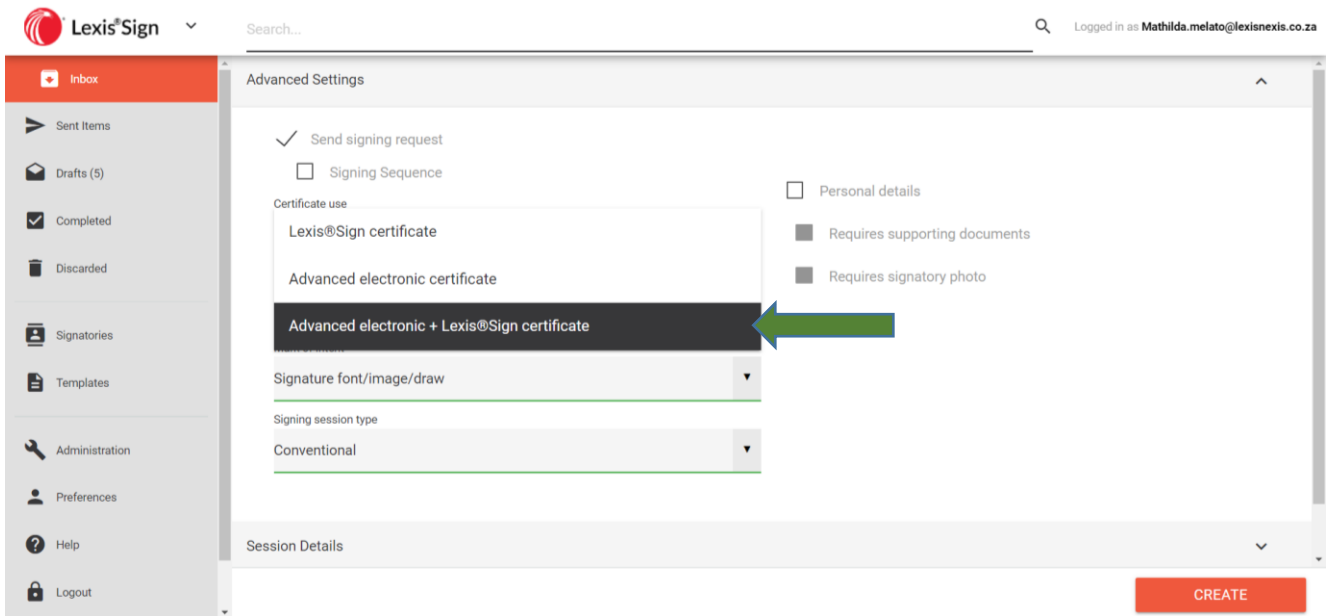

V1.28.125.0

2020/09/22

Enhancements

1. Created the ability to have a signing session that allows a user to insert an AES signature block and a normal signature block.

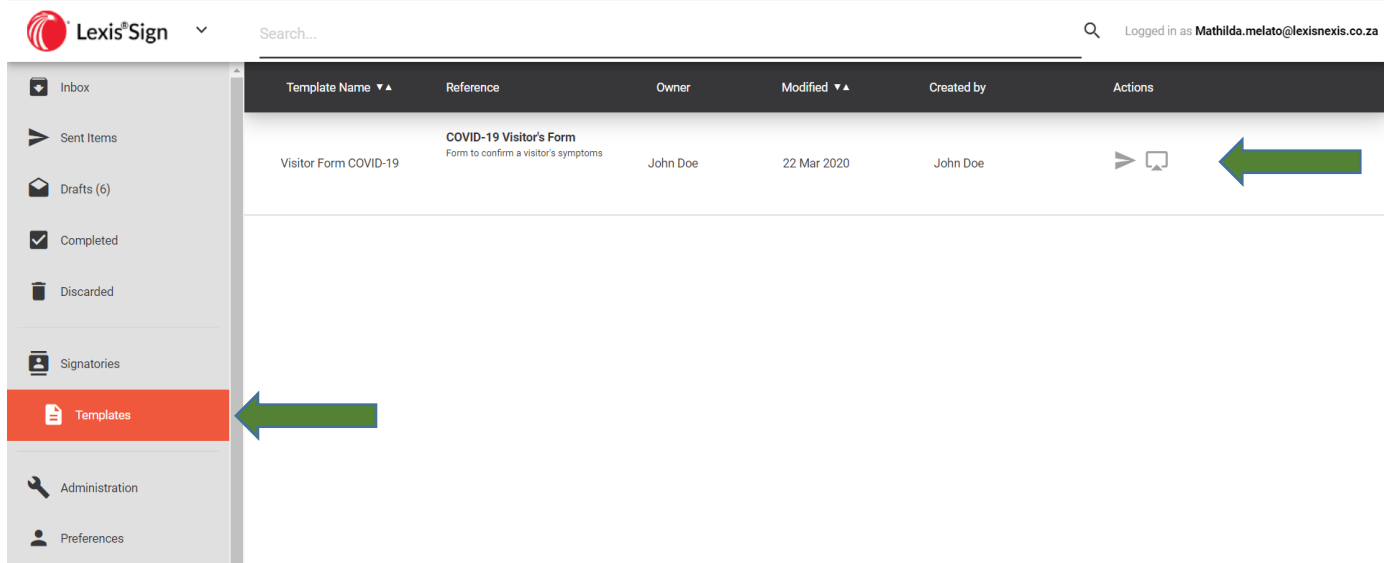

Screen Shot

2. Created the ability to Sign a document that has a normal LS certificate signature block and an AES signature block

3. Renamed "COVID-19 Template" menu to "Templates"

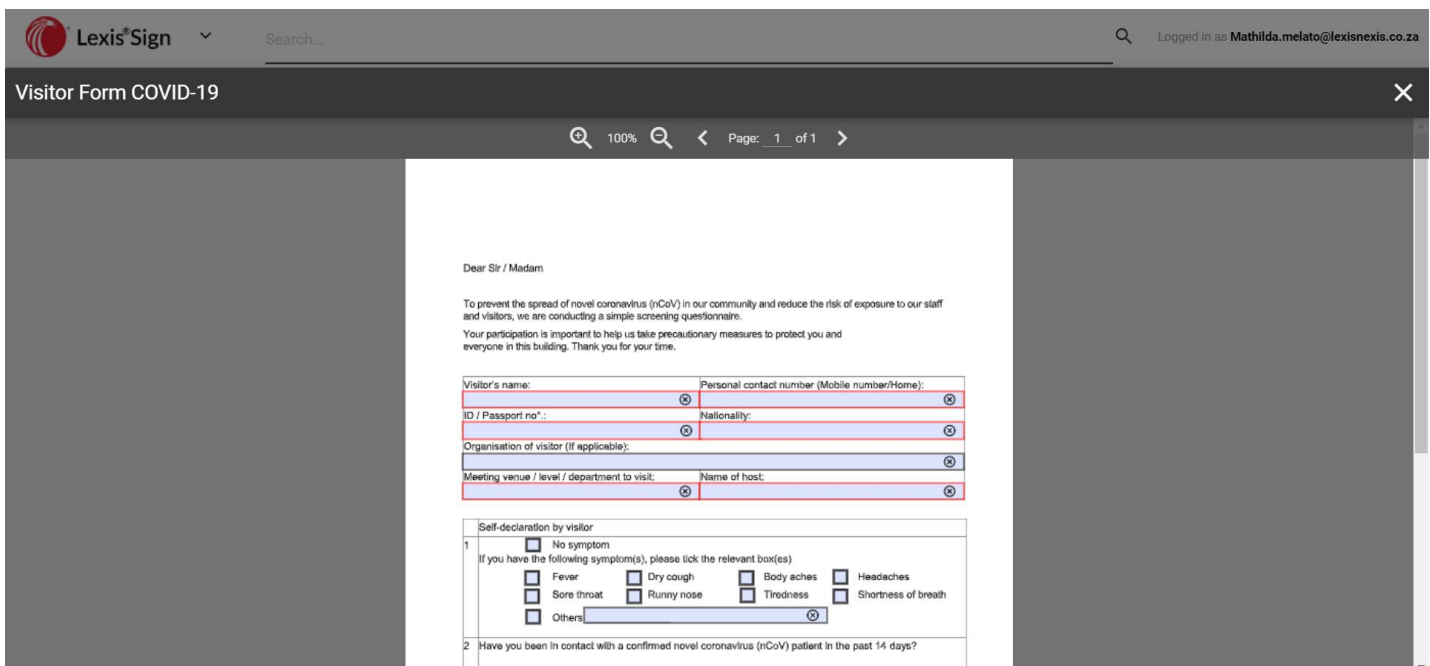

Screen Shot

4. Made the template functionality usable in its current state – The look and feel has changed. Users can still send COVID-19 Visitors Form Template but cannot create their own personal templates. See Screen Shot above, for number 5

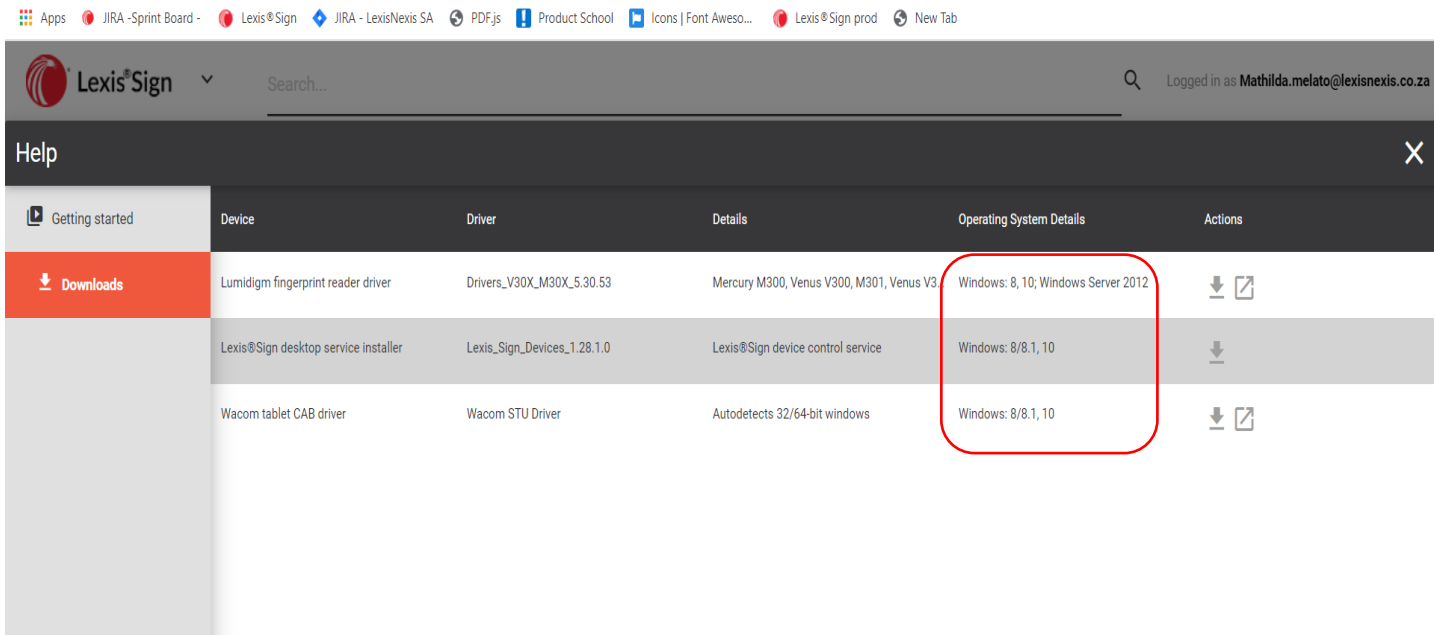

5. Created the ability to Preview Templates

Screen Shot

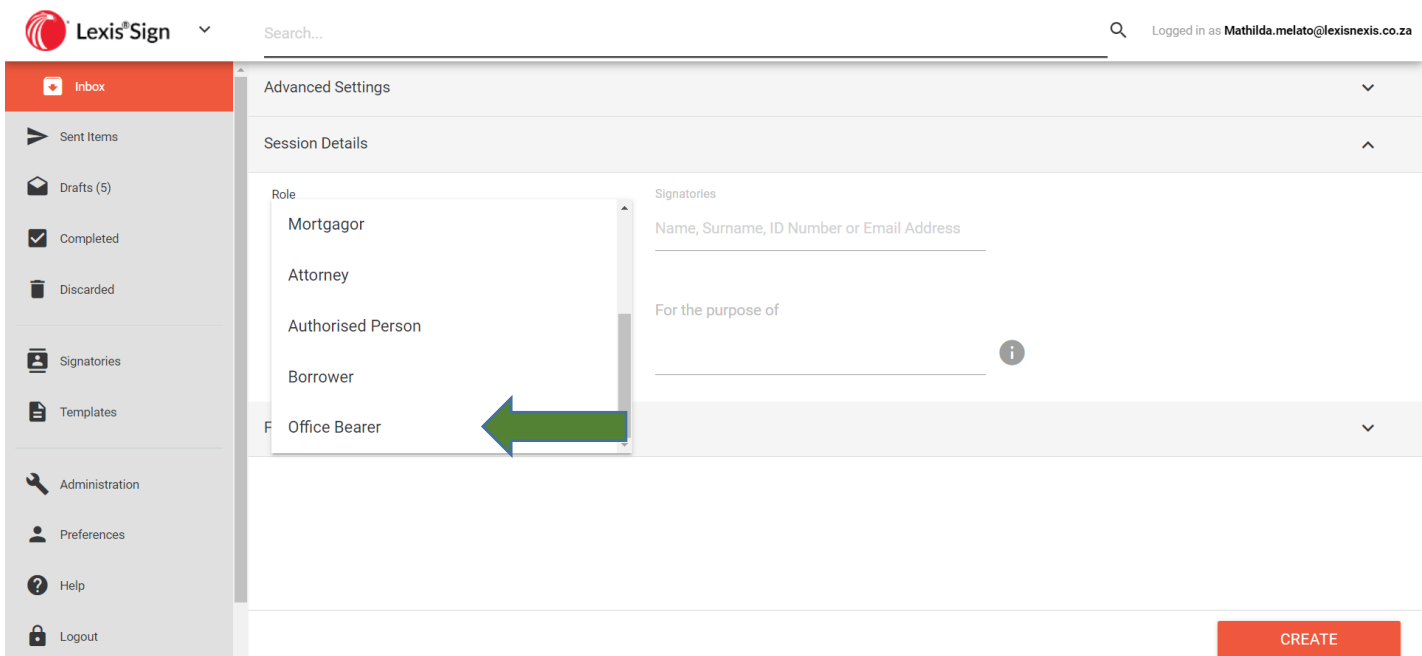

6. Removed (7) under downloads on Lexis Sign as an indication that we do not support windows 7

Screen Shot

7. Created a new role called "Office Bearer"

Screen shot

Fixed Bugs

1. Draft: Tool-tips were missing from the floating edit and finalize button
2. Signing Large Documents

Technical Task

1. Increased performance for the loading of signing sessions
2. Redirecting the user-agent to the authorization server - Stordoc e4 integration
