

# HIRA

## IDENTIFY. ACCESS. PRIORITISE.

Lexis® GRC, turning risk into value through effective Hazard Identification and Risk Assessment or Aspect Identification and Impact Reduction.

### Why Lexis GRC?

A comprehensive reputation protection solution supported by world-class regulatory content. It is the governance, risk, and compliance software that executive boards rely on. With a variety of modules available, you can customise your solution to meet your specific requirements.

### Other Lexis GRC modules

- Auditing
- Compliance
- Enterprise Risk Management
- Forms and Checklists
- HIRA
- Incident Management
- Legal Universe & Registers
- Lexis® Assure Regulatory Alerts
- Occupational Hygiene
- Surveys

Reducing your risks comes from knowing where they're located. With Lexis® GRC's Risk Assessment module, you can now identify hazards and assess them according to your specific risk matrix. This allows you to prioritise these according to assigned risk ratings.

With our Risk Assessment module, Risk Assessment Best Practices are available straight out the box. These stages are built in line with standard HIRA process criteria.

### In-depth scoping before assessments begin

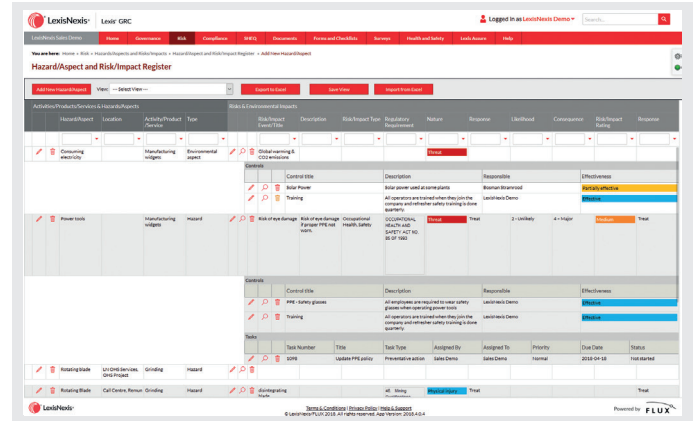

We provide you with a simple guided process that ensures you ask the correct questions before any risk assessment begins. As a result, you'll receive a correct and complete scope for every assessment.

### Controls and corrective actions

Prioritise risk controls for corrective action using the action management tool. Guarantee that all identified risks are promptly and effectively resolved by setting automated email monitoring alerts and deadlines.

## Identify your hazards and environmental aspects

Enjoy guided prompts that allow you to take all possible hazard scenarios into consideration. Through extensive research from worldwide authorities like the UK Health and Safety Executive, Workforce and Workcover from Australia, and National Safety Council from the USA, all prompts are accredited and legitimate.

## Evaluate all risk factors and environmental impacts

Lexis® GRC offers you ease of use alongside accurate risk and impact predictions. Our risk assessment module will provide you with a simple 5x5 matrix methodology for convenience and evaluation purposes. This can be utilised as a 2 or 3-d matrix, depending on your preferences. Adjust levels to create larger or smaller grids with this flexible tool that can be tailored to suit your needs.

Configurations to suit your needs. Customise any existing risk matrix to suit your company's unique needs and rank these according to your risk ratings.

Choose a value for money system that evolves with you. If you are looking to conserve resources, minimise risk and guarantee continuous improvement, don't start from scratch - contact LexisNexis today.
